DETAILED ACTION

Response to Amendment

1. This action is in response to the amendment dated November 16, 2007 in application 09/313,532.

Reissue Applications

2. Claims 24-55 are rejected under 35 U.S.C. 251 as being an improper recapture of broadened claimed subject matter surrendered in the application for the patent upon which the present reissue is based. See *Pannu v. Storz Instruments Inc.*, 258 F.3d 1366, 59 USPQ2d 1597 (Fed. Cir. 2001); *Hester Industries, Inc. v. Stein, Inc.*, 142 F.3d 1472, 46 USPQ2d 1641 (Fed. Cir. 1998); *In re Clement*, 131 F.3d 1464, 45 USPQ2d 1161 (Fed. Cir. 1997); *Ball Corp. v. United States*, 729 F.2d 1429, 1436, 221 USPQ 289, 295 (Fed. Cir. 1984). A broadening aspect is present in the reissue which was not present in the application for patent. The record of the application for the patent shows that the broadening aspect (in the reissue) relates to claim subject matter that applicant previously surrendered during the prosecution of the application. Accordingly, the narrow scope of the claims in the patent was not an error within the meaning of 35 U.S.C. 251, and the broader scope of claim subject matter surrendered in the application for the patent cannot be recaptured by the filing of the present reissue application.

Regarding claims 24 and 40, in the parent application 08/346,603, applicant surrendered a broad claim 1 in view of an amended version in amendment 'A', dated

March 07, 1996. Amendment 'A' specifically presents a claim which included the limitation "...wherein said video display generator display said n characters and said selection means comprises means for causing said character displays to cycle forward and backward through a plurality of alphanumeric characters and means for assigning one of said alphanumeric characters to each of said n characters."

On page 14 of the amendment 'A', applicant specifically argues, "Furthermore, even if the teachings of Reed are applied to either Young or Vogel, because Reed does not disclose how to select multiple characters in a title using only a remote control device, one of ordinary skill in the art would still not be possessed of the invention described and claimed by applicants. For example, parent application 08/346,603, claim 1 has been amended to recite i) that a plurality of characters in the title are input by the user, and ii) the specific means by which this is done - providing a user selection means 'to cycle forward and backward through a plurality of alphanumeric characters' in order to locate each of the desired characters in the title."

At least the argued limitation of "cycle forward and backward through a plurality of alphanumeric characters" in claim 1 of the parent application 08/346,603 appears to be absent from the reissue application claims 24 and 40. There doesn't appear to be a broader version of this argued limitation on the reissue application claims 24 and 40 in order to avoid recapture under Ex parte Eggert, see MPEP 1412.02.

Allowable Subject Matter

3. Claims 1-23 are allowed.

Response to Arguments

4. The rejection under 37 C.F.R. 3.73(b) is now withdrawn in view of the new statement of consent.

Applicant's arguments filed November 16, 2007 have been fully considered but they are not persuasive.

Applicant also argues that claims 24 and 40 include broader limitation that describes the specific means used by which the selection means operates to select the n characters used to search for a title. However, upon further review with Chris Kelley and Ken Wieder, it was determined that there doesn't appear to be a broader version of "cycle forward and backward through a plurality of alphanumeric characters" on the reissue application claims 24 and 40 in order to avoid recapture under Ex parte Eggert as discussed above. In the parent application 08/346,603, applicant has amended and argued this limitation in order to overcome the prior art (See discussion above).

The examiner suggests amending the claims 24 and 40 to incorporate the cycling features in order to avoid recapture under Ex parte Eggert.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
